

NeuComm designs, builds and maintains neutral host wireless solutions; supporting wireless carriers, IoT devices, and safety infrastructure for governmental agencies and private property owners. Beyond neutral systems, we provide consulting services for municipalities to aid in the development of master plans and design standards. We connect the dots to build a better network - a "smart" solution for your city or property.

Connecting Lives

Connecting Cities

Why NeuComm Solutions

We have over 100 years of combined knowledge, skill, and training to build the most complex solutions.

NeuComm Solutions is woman owned. It is one of few STEM based construction companies owned by a woman.

Each wireless solution offers its own unique set of challenges. Our experience and knowledge provide us the skills to navigate through every type of project.

Safety and the environment are **S**core values. We make it a priority that our workers, customers and work place are safe and clean.

We get the job done on time and within budget. We ensure a seamless process from beginning to end while communicating throughout the process.

We successfully create partnerships between property owners, municipalities, and carriers. Your one source solution - NeuComm Solutions.

A frustrating problem

- Multiple small cells on every street corner. The “blight” every city is worried about.
- Cities have to work with multiple wireless carriers and comply with federal regulations.
- Carriers build at different times, upsetting sidewalks, streets, and traffic repeatedly.

A “smart” solution - NeuComm

- Neutral host infrastructure to accommodate all carriers as well as IoT sensors, safety and other miscellaneous devices.
- City works with one company.
- Construction is done with limited disruption.

NeuComm is your solution

- Helping your city stay safe
- Improving your city's environment
- Leveraging technology to reduce operating costs
- Balancing technology with your city's style
- Flexibility in cost and ownership structure
- Adaptable maintenance plans
